SUMMARY

Full Stack .NET Developer specializing in building web applications with C#, ASP.NET Core Web API, Entity Framework Core, Angular, TypeScript, and SQL Server. Currently a Software Developer at Star Neon, building RESTful APIs and Angular modules for an enterprise management system, with JWT authentication and optimized SQL Server stored procedures. Works in Agile/Scrum teams across the software development life cycle, from requirement analysis and sprint planning to version control and deployment with Azure DevOps. Completed an intensive Full Stack Web Development program at Orange Coding Academy, delivering 10 projects.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, HTML, CSS

Back-End: .NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ, RESTful APIs, JWT Authentication, Dependency Injection, ASP.NET MVC 5

Front-End: Angular, TypeScript, Bootstrap, Responsive Web Design, React, React Native

Databases: SQL Server (stored procedures, query optimization), Oracle SQL

Tools & Platforms: Git, Azure DevOps, GitHub, Visual Studio, Visual Studio Code, Figma, Trello

Methodologies: Agile, Scrum, Software Development Life Cycle, Requirement Analysis, Sprint Planning

Soft Skills: Problem-Solving, Critical Thinking, Analytical Thinking, Effective Communication, Teamwork & Collaboration, Adaptability, Continuous Learning, Time Management, Attention to Detail, Accountability

EXPERIENCE

Software Developer **Jan 2025 – Present**

Star Neon

- Developed and maintained features for an enterprise management system using ASP.NET Core Web API, Angular, and SQL Server.
- Built scalable RESTful APIs with C#, ASP.NET Core Web API, and Entity Framework Core, applying Dependency Injection and clean, layered architecture.
- Implemented JWT (JSON Web Token) authentication and authorization to secure ASP.NET Core Web API endpoints.
- Wrote efficient data access logic with LINQ and Entity Framework Core, and optimized complex SQL Server stored procedures to improve query performance.
- Contributed to an advertising management platform, building back-end APIs and responsive Angular/TypeScript front-end modules.
- Used SQL Server for data tracking and debugging production issues.
- Supported React and React Native development tasks alongside the main .NET/Angular stack.
- Participated in requirement analysis and sprint planning within Agile/Scrum teams, using Azure DevOps for version control and deployment.

Full Stack Development Trainee (Internship) **May 2024 – Dec 2024**

Orange Coding Academy

- Delivered 10 full-stack web projects during intensive training, covering front-end, back-end, API, and database development.
- Engineered and integrated APIs using C# and ASP.NET Core Web API, and built web applications with ASP.NET MVC 5, improving application functionality and data exchange.
- Developed dynamic, interactive web applications using HTML, CSS, JavaScript, and TypeScript.
- Implemented responsive user interfaces with Angular and Bootstrap, ensuring consistent experiences across devices and screen sizes.
- Managed and queried SQL Server databases, optimizing data handling and retrieval.

PROJECTS

1. E-Commerce System | GitHub: github.com/EsraaOdat/Flower-E-Commerce-
Description: The E-Commerce System is a platform designed to simplify online buying and selling. It features a user-friendly interface built with HTML and CSS, and uses JavaScript for interactivity. On the back end, C# and ASP.NET Core Web API handle business logic and data management, with SQL Server used for data storage. The system also includes an admin dashboard for managing products and tracking orders.

2. Parliamentary Jordanian Election System | GitHub: github.com/EsraaOdat/Project-5
Description: This system has been developed to facilitate online voting, application submission, advertisement management, and election result display. The primary objective is to create a comprehensive platform for managing elections within Jordan, utilizing ASP.NET MVC 5 with C# for its core functionalities.

3. Feedback System | GitHub: github.com/EsraaOdat/Project-4-
Description: A comprehensive course management platform developed to facilitate seamless course management, feedback collection, and progress tracking, aiming to enhance the educational experience for both students and administrators.

4. HR System | GitHub: github.com/EsraaOdat/Project-3-
Description: A streamlined HR system that simplifies HR processes, including employee management and attendance tracking.

EDUCATION

Full Stack Web Development Bootcamp **May 2024 – Dec 2024**
Orange Coding Academy, in collaboration with Simplon and Princess Sumaya University for Technology (PSUT)

Bachelor's Degree in Computer and Network Systems Engineering **Sep 2019 – Sep 2023**
Al-Balqa Applied University | GPA: 3.24 / 4.00 (Very Good)

TRAINING

CCNA Training Course **Sep 2023 – Dec 2023**
SDK Company
Participated in an intensive CCNA course, applying learned concepts practically in real-world scenarios and demonstrating hands-on expertise by contributing effectively to collaborative projects.
